LOCAL ENVIRONMENT

As a responsible teaching institution, environmental review/assessment and management is made a part of the curriculum for the student teachers. Air, water and soil samples are periodically assessed by the students, as a part of their laboratory sessions using standard protocols, and the observations recorded. In addition, samples are collected and handed over to environmental auditing agency for evaluation. Adoption of Green environmental practices like use of solar power, nurture biodiversity, improve greenery in and around the campus, avoid/minimize plastic use, rain water harvest, proper solid waste management, use of public transport and others.
